Forecast for Thursday 09 Nov 2023

Weather: Sunny spells throughout the day but blustery showers, which will be wintry near the tops (above 700-800m). Strong winds at first will decrease during the afternoon and evening. Feeling colder than lately especially in stronger winds over higher ground.

Chance of cloud-free hill tops above 800m: 60-70%

Low cloud and visibility: Rapidly moving showers will lower cloud bases to 500-700m at times, covering tops, but these should quickly clear. Visibilities will generally be good but can become moderate at times in showers and temporarily poor to very poor over higher ground, as cloud bases drop.
